Warning : to enable the J-TAG communication it is necessary to perform the 5 short-circuits LINKS as displayed in the following pictures.

The ECU can be placed back in the vehicle without removing the short-circuits LINK

Microprocessor's opposite side

Connect the wires on the pads avoiding any short circuits. Remember to perform the LINKS as shown at pg.6, otherwise JTAG communication will not be active.

DIMA CONNECTION

LJTAG pads are located under the microprocessor, LINKS of pg. 6 are mandatory.

For the metal positioning frame connection is required the F34DM025 adapter.

The following pictures are merely indicative
