WARNING:

IF on the ECU board the 5 components marked in the picture here below are present you do not have to perform any other special operation, you can proceed with the BOOT&CNF1 direct connection.

IF on some ECU some components are missing it is necessary to perform the little bridges LINK1 & LINK2 and move the chip 1 & the resistor 2 as displayed in the following pictures. At the end of the operations, before placing back the ECU into the car, it is mandatory to place in their original position the 2 components (chip & resistor) and remove the little bridges LINK1 & LINK2.
